Claim Objections

Claims 4-36 are objected to as being improper multiple dependent claims. A multiple dependent claim cannot depend from another multiple dependent claim. The claims have not been further considered. See MPEP § 608.01(n).

Specification

The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Some examples of areas of indefiniteness are as follows: claim 1, in line 2, "for example", in lines 2 and 3, the multiple alternatives "or", in line 4, "if required" and, in line 8, "or any". The afore mentioned are only some examples of the indefiniteness associated with the claims. Applicant should review and revise all the claims to ensure

they comply with the requirements of section 35 U.S.C. §112. The claims were examined as best understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3/1 are rejected under 35 U.S.C. 102(b) as being anticipated by Beine (US 4,739,601). Beine discloses a functional element comprising a sheet metal part (1) and a bolt element (6) comprising a cylindrical rivet part (8) and a conical region (7) which extends from the rivet part to an outer boundary which not larger than a maximum diameter. The conical region forms a contact surface which corresponds to the sheet metal part (at 7'). The conical part is approximately twice the thickness of the metal sheet.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/510,375

Art Unit: 3677

Page 4

Claims 2 and 3/2 are rejected under 35 U.S.C. 103(a) as being unpatentable

over Beine as applied to claim 1 above, and further in view of Moulton (US 5,365,654).

Moulton discloses a functions element having a conical surface (13) provided with

features (14) to prevent rotation. At the time the invention was made, it would have

been obvious for one of ordinary skill in the art to provide the conical surface of Beine

with rotation prevention features as disclosed in Moulton in order to prevent the rotation

of the bole element relative to the sheet metal.

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Flemming Saether whose telephone number is 571-272-

7071. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.
